The Gravel Gossip

Newsletter of

The Diamond State Aquarium Society, Inc.

For the February meeting, Chris Edwards spoke on Box and Sponge filters and how to use them. Based on what he said, I may be changing over a lot of my freshwater tanks from hang-on filters to box and sponge filters. Seems that simplicity is not only less costly, but very efficient and good biological filtration.

Our auction was fantastic and growing larger each month. Lots of live fish and plants, as well as aquarium drygoods.

Our March meeting will have Dave Krah doing a presentation on "Killifish". This should be a very educational experience for many. The presentation starts at 7:30pm sharp.

Please note our speakers scheduled for the May and June meetings on our website.

Please note our earlier meeting start time of 7:00pm. The school wants us out at around 9:00pm, so we need to start earlier in order to meet that new closing time.

At our monthly meetings, our door prize and members-only drawings now start at 7:15pm, while the monthly raffle and the club auction begins towards the end of the meeting, usually around 8:15pm each month.

Please take note, due to higher security at the school, the front doors cannot be left unlocked or open unless someone is going to stand by the door. We will have someone there between 6:45 and 7:10pm, so please be on time. If you come later and the door is locked, either call Marty on his cellphone at 302-363-6902 or Chris at 302-382-3051 and he will have someone let you in. Otherwise, you will have to knock real hard (just don't break the glass)!

Anyone interested in being a board member and help plan the activities for the upcoming year, please contact any of the officers.

Refreshment donations brought in by members is greatly appreciated by all.

Be sure to visit us on Facebook and on our new website, <http://dsas.online> or <http://dsas.club>. The site is updated monthly with any presentations scheduled for future meetings.

See you all at our **MONDAY, March 9th** meeting at **7:00pm** sharp!

Marty Z

For Sale: "Almost Natural Tropical Fish Food"

For many years now as most of you know, I have been making my own frozen fish food. It has changed over the years to the point that I am using mostly fresh and naturally found seafood - it contains NO fillers - absolutely NONE! Anyone who has been to my home and seen my fish can attest to the fact of how well this food has been for them. The tremendous size they put on at such a young age and the colors are both astounding, not to mention the overall health of the fish. I attribute it to my homemade "Almost Natural Frozen Tropical Fish Food". With basically all of the same ingredients, I am proud to offer "Almost Natural Tropical Fish Food" in flake and pellet form to other hobbyists.

*** **FRESHWATER FLAKES** ***

Brine Shrimp DIRECT →

PRODUCTS TO MAKE YOUR TANK THRIVE!

Online at www.brineshrimpdirect.com

Brine Shrimp Direct welcomes Diamond State Aquarium Society and its members to our new Club Discount Program.

All members placing orders online will save 5% off of their order when entering your new affiliate ID#* in the promotional code box. Group Purchases over \$250 (excluding brine shrimp eggs) will receive a 7.5% discount. Brine shrimp eggs will receive a maximum discount of 5%.

We are always available by phone and email to answer member questions about our products or take phone orders for customers who prefer the personal touch.

We have recently added a number of new products including:

- Live Brine Shrimp!
- Live Copepod starter cultures. (\$9.95)
- Enriched Brine Shrimp
- Frozen Daphnia
- Frozen Krill Pacifica Plankton
- Frozen Mysis
- Frozen Rotifers
- Frozen Bloodworms
- all of the above in convenient cube trays.
- Plus Flake Sampler

Flake Diets Plus 4 Pack which contains 1 ounce jars of our Garlic Plus Flake, Phyto Plankton

Plus Flake, Zoo Plankton Plus Flake and Mariner Plus Flake. (\$9.95)

Group Purchases will need to be made via phone (800-303-7914 or 801-782-4700), email (sales@brineshrimpdirect.com), or fax (801-782-4200)

Please remember to include DSAS's ID#

IT'S AS EASY AS A B C . . .

AQUARIUM BASIC CONCEPTS . . .

Article in the ABC Series

By Ed Keene, DCAS

Part #27 in This Series

By Ed Keene, DCAS

Why Quarantine?

Have you ever heard of anyone who had a very well established show aquarium with beautiful, happy, and healthy fish? Well one day they decided to go acquire another fish to add to their aquarium. They brought it home and after having gone through the new fish acclimation process, added it to their aquarium. Within a week several fish had died and several others were looking pretty bad. Turns out a disease was running wild in the aquarium and it all originated from the newly acquired fish. This scenario happens often, more especially with beginning hobbyists. This problem can be prevented and one of the best ways is by the use of a quarantine aquarium.

One of the main purposes of the quarantine aquarium is to hold newly purchased or otherwise acquired fish in an aquarium for a period of 2 to 3 weeks. Keeping a fish separated from any future aquarium mates allows for easy disease detection and other observation. Many times an infected fish will not show any signs of the disease for 10 to 14 days. By keeping a fish in a quarantine aquarium you allow for the disease to proceed through its cycle and finally show itself. If during the quarantine period, the fish should show signs of parasites or other disease, you can medicate it with absolutely no risk of impacting the fish in your show aquarium. It is also very cost effective to medically treat a small quarantine aquarium rather than a much larger aquarium.

The size of your quarantine aquarium will be based upon the size of fish you are going to acquire. For the average sized fish, say up to 4 or 5 inches, a 10 gallon aquarium will serve the purpose well. The quarantine aquarium does not have to have the best and the fanciest equipment on it. In fact, quite the opposite is the suggested way to go and the preferred way of the more experienced hobbyist.

Keep it simple! The standard equipment for the quarantine aquarium is the aquarium with a cover of some type, a heater, a low tech filter without carbon, a light, and a decoration of some type. The decoration, which does not have to be anything fancy, is simply to give the fish a feeling of security, knowing that it has something to hide behind or inside of. A piece or two of plastic PVC pipe will work just fine. This is all you need. It is basically a bare aquarium - no gravel, no plants, no nothing -other than what I previously mentioned. Keep in mind the quarantine aquarium is established to aid in the cure of any fish which might be infected with some type of disease. It is not one which is being entered into the world's greatest looking aquarium contest.

Most any type of filter is adequate provided carbon or charcoal is not used. Remember, carbon adsorbs chemicals in the water, i.e. medication. If you end up medically treating the quarantine aquarium, the carbon will defeat your attempts. Power filters, corner box filters, even canister filters can be used. Just remember - no carbon. Because several of the aforementioned types of filters are expensive and not really being used to their full potential, many hobbyists turn to sponge filters for quarantine aquarium use. The sponges are inexpensive and will provide good bacterial filtration. The sponge filter can be operated with an air pump or with a power head attached to it.

If medical treatment of your fish is necessary, you should allow for another 2 to 3 week period of quarantine after your last treatment. This will assure that a subsequent disease cycle is not in progress. Once this period has been completed, you can begin the acclimation process of moving your fish to your show aquarium.

Continued page 11

Continued from page 10

In conclusion

If you have the space available for a quarantine aquarium, it would be a wise decision on your part to have one and put all future fish acquisitions through the quarantine process. Of course on the other hand, if you reject the idea of a quarantine aquarium and a disease completely terminates the life of all your prize fish, you have the dubious distinction of being able to go out and spend lots of money to purchase all brand new fish! The choice is yours.

DSAS Monthly Board Meetings

DSAS monthly board meeting scheduled for Saturday, March 7th, at **7pm** at Marty's house at 13 Saratoga Drive, Penn Acres South, New Castle, DE 19720-4224. Phone: 302-322-8187.

All DSAS board members are requested to attend and confirm if they are able to attend.

Other members are welcome to attend.

These monthly board meetings will be scheduled on the Saturday before the general monthly meetings each month, including the summer months. The meetings will be used to discuss future club activities, scheduling of speakers, field trips, and planning for the annual auction.

Directions:

Same side of Basin Road as WP High School, shared development entrance with Penn Mart Shopping Center (Big Lots, Save-a-Lot, Rainbow stores, PNC Bank).
